

## BLOCKCHAIN PORTFOLIOS

Market Guard<sup>®</sup> Blockchain is a model portfolio designed to provide investors with indirect exposure to the cryptocurrency space.

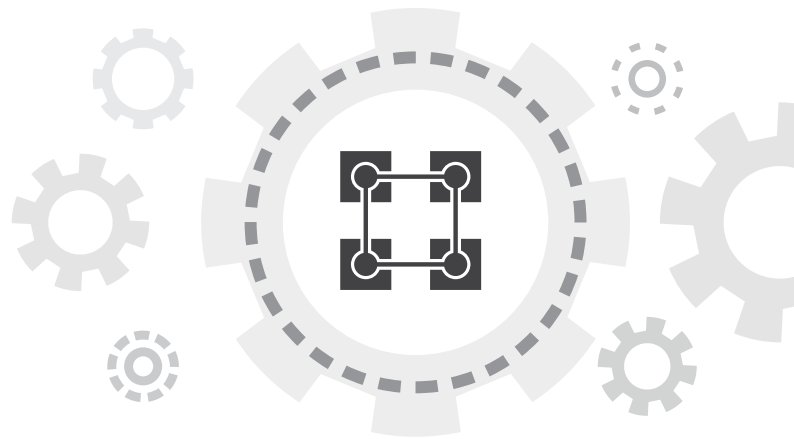

### Market Guard<sup>®</sup> Blockchain Model Portfolios

*The goal is to benefit from this asset class, without the need to directly purchase the actual cryptocurrency itself.*

Diversification can be a key component to the success of a portfolio. By investing in companies involved in the blockchain and crypto ecosystem, it can offer investors diversification from traditional financial assets such as stocks and bonds.

Market Guard will seek to participate with companies that hold large amounts of Bitcoin (or other forms of cryptocurrency) on their balance sheets, companies participating in mining, semiconductor, and transactional/consumer interaction.

Unlock the future of investing with blockchain portfolios — a gateway to secure, transparent, and decentralized asset management.
